Passionate about technology and social good, we are a team of aspiring consultants with diverse skill sets. Together, we leverage cutting-edge technology to create a positive impact on the world.

Digitalizing Parking: The one stop solution

There has nearly been a **40% increase** in the number of vehicles in India over the past 5 years[1]. However, there has not been a corresponding increase in the number of parking spots. India is poised to face a **parking pandemic** by the end of **2028**.

Studies suggest that most of the parking problems in India are due to unorganized parking spaces, not working to their full potential. This calls for a digitalized parking setup that can tap into the actual potential of India's parking infrastructure. This is further supported by **India's Goal of Smart City and Digital India**. This is where our startup steps in to **unify the parking setup for India** and provide **parking spot pre-booking** using our APP.

*Problem
to be
Solved*

10 min

Average
waiting time to
find parking in
city

30% Traffic

Increase in
traffic in search
of parking
places

100 Thefts

Observed in Delhi
daily, due to
parking in non-
standard areas

Black Marketing

Parking vendors
exceed govt-set rates
for personal gain

Unoptimized Routes

Available Parking
spaces often far away
from
event/destination

*Where do
we fit in?*

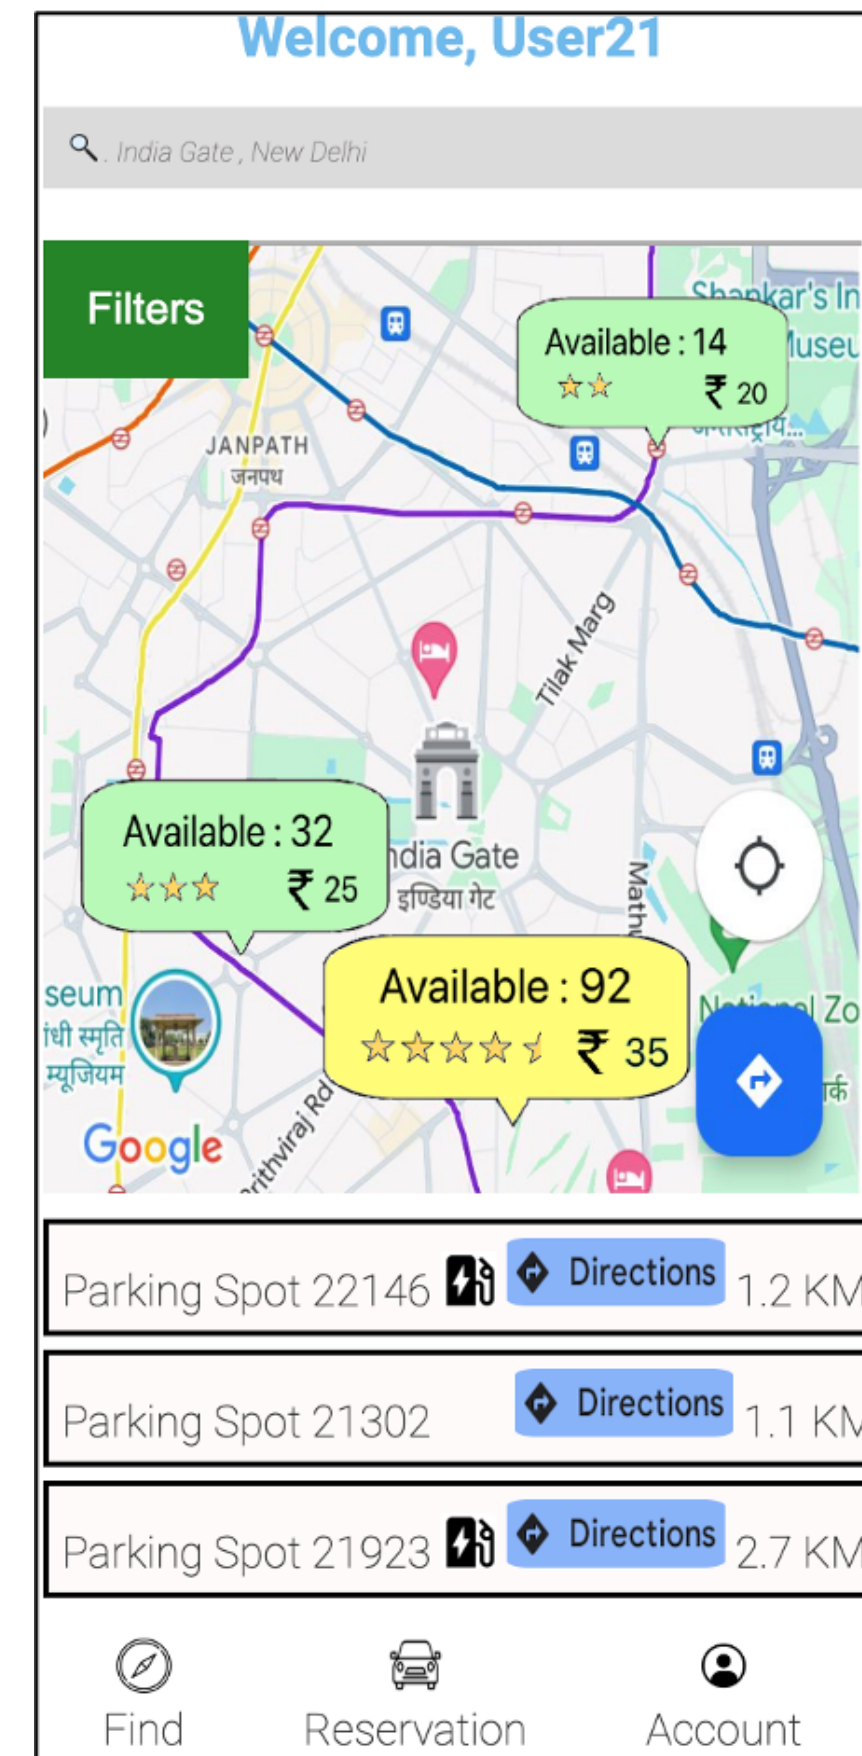

Book and pay
for parking in
advance.

Real-time
availability info to
find parking
faster.

Secure parking
options & real-
time monitoring.

Transparent
digital
payments &
fair pricing.

Provides route
optimization, using
parking space
availabilty and multiple
modes of travel

Market Size

- At present, nearly 97% of the parking spaces in India are unorganised.
- India’s Smart Parking Market is estimated to be USD 350.55 Mn in 2023 and is expected to reach USD 593.63 Mn by 2028, growing at a CAGR of 11.11%.

Case Study of Delhi :

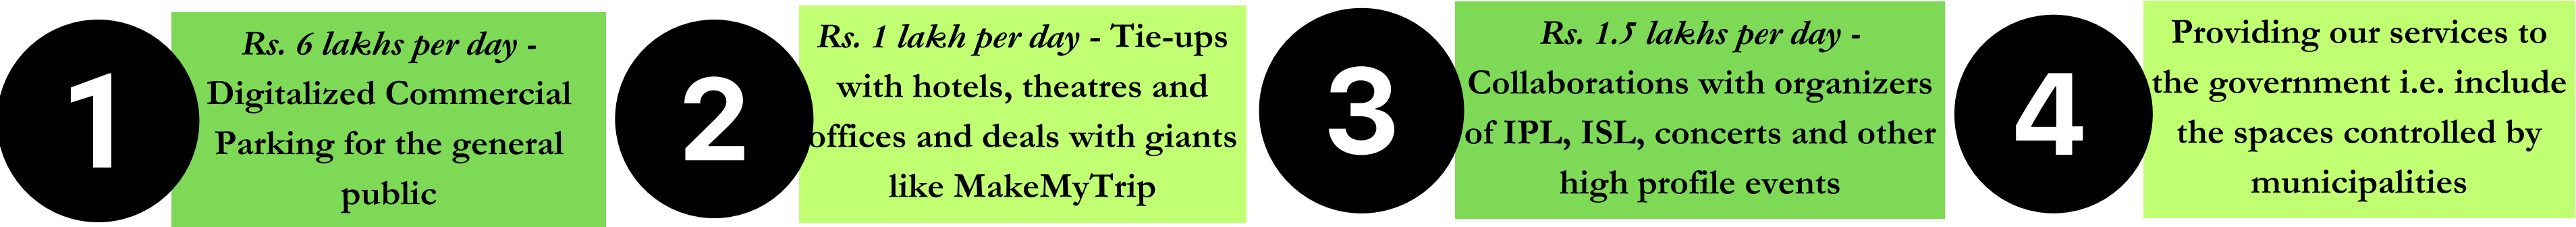

TAM = Number of 4 wheelers in Delhi
= 30 lakh

SAM = Number of private vehicles used daily (avg)
= 10 lakh

SOM = 70% of SAM (no major player in Delhi)
= 7 lakh

Market Segmentation and Revenue (for Delhi) :

Market Entry Analysis

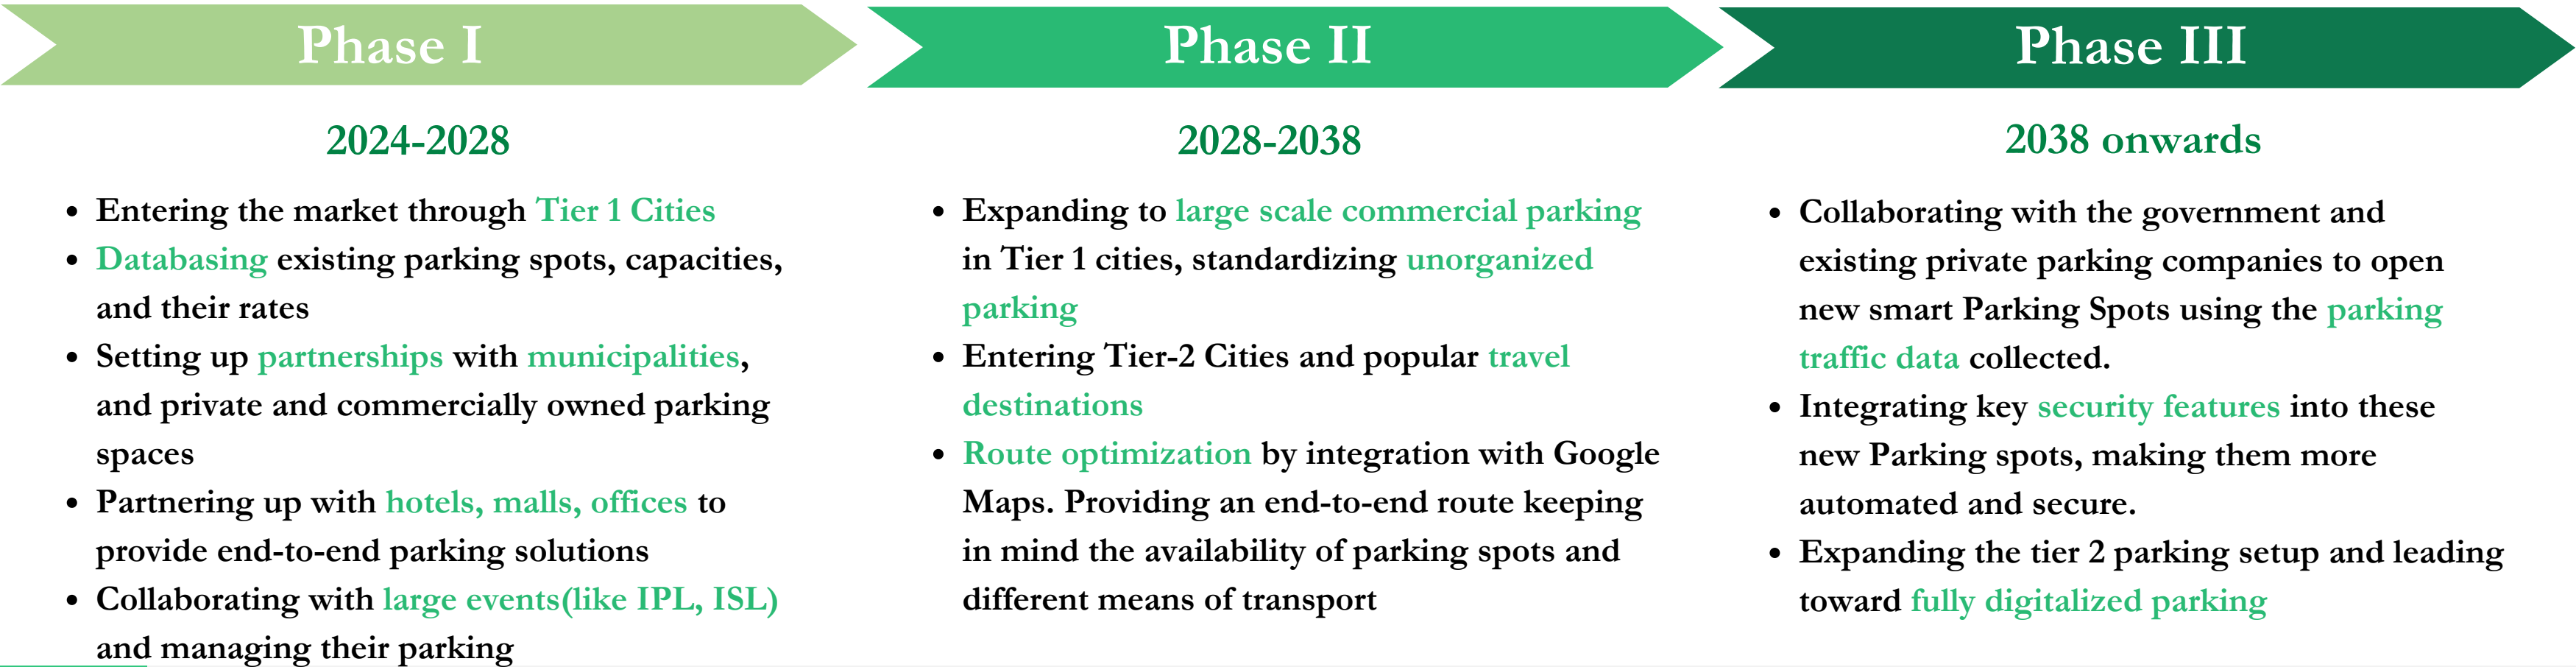

We aim to start the business in **Tier 1 cities**. This is majorly due to the larger share of the population traveling using a car, thereby creating a need for a systematic parking mechanism. This is further accompanied by the higher rates of **digitalization** in these areas, helping in a seamless adoption of our technology.

Business Model

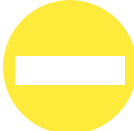

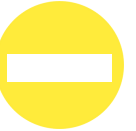

- **B2C**- People can prebook their parking spots through our APP. Alternatively, they can also apply for a subscription-based model for a periodic parking requirement (eg. parking near the office everyday).
- **B2B**- Offering as a SaaS to large companies with inadequate parking spaces.

Market Entry Collaborations

Book your parking tickets along with your event/movie tickets		
		Book your parking along with your hotel stay
Providing advanced route optimization considering the availability of parking spaces		
		Parking for various events like IPL, concerts etc.

Smart Parking Solutions: Competitive Analysis

Features	User Interface / User Experience	Safety and Security	Availability	Effective collaboration	Route Optimization
Park+	 Good but disfunctional currently	 Gated Entrances	 Very limited locations	 Partnered with some hotels	 No Provision
ParkingPal	 Good but disfunctional currently	 No Safety Provision	 Very limited locations(Only Pune)	 Partnered with some Corporates	 No Provision
ParkMate	 Working App	 Gated Entrances	 Has own parkings so limited locations	 Has own parkings so no collaborations	 No Provision
Our Solution	 Strong Tech	 Smart Card	 Plan to reach all tier-I cities by phase 1	 MNCs, Municipalities, Event Apps	 Partnering with navigation apps using their API

Risk Analysis

- *Illegal Prices- Parking space owners selling tickets at a higher price illegally.*

Soln: Keeping **security deposit** from the owners and then imposing a fine if a customer complains and is found guilty

- *Theft- Stealing of the vehicles*

Soln: **Providing smart card** at the time of parking, which shall help the owner monitor the location of the car. Offering security and increasing brand loyalty.

Current Market

The current market for Smart Parking Setup is still in its **early stages** with **no major dominant player** and has a lot of untapped potential.
